Lerato Pinky Thungo

AI Software Developer | Full-Stack Developer | Cybersecurity
thungolerato@gmail.com | 0835213980 | github.com/LeratoDaisy | Johannesburg, South Africa

PROFESSIONAL SUMMARY

Early-career software developer with hands-on experience building AI-powered solutions, full-stack applications and client-focused automation workflows. Experienced in front-end development, APIs, databases, project coordination and foundational cybersecurity practices. Comfortable learning new technologies quickly, solving problems collaboratively and contributing to projects from development through delivery.

TECHNICAL SKILLS

Development	JavaScript, React, Next.js, Tailwind CSS, Full-Stack Development
AI & Automation	AI-powered applications, automation workflows, integrations, AI voice agents
Backend & Data	APIs, databases, system integrations
Cybersecurity	Vulnerability assessment, threat analysis, basic penetration testing, security reporting
Professional	Project coordination, stakeholder communication, problem-solving, teamwork, attention to detail

PROFESSIONAL EXPERIENCE

AI Software Developer

Leib Technologies | Johannesburg | May 2026 – Present

- Engineer AI-powered solutions for clients, including automation workflows and system integrations.
- Support system uptime and continuous improvement of deployed solutions.
- Contribute to practical AI development work focused on solving business and client needs.

Cybersecurity Virtual Intern

MWR | Virtual | March 2026 – May 2026

- Identified vulnerabilities and analysed security risks in a simulated environment.
- Supported basic penetration-testing activities and threat-analysis tasks.
- Used security tools and documented findings through clear technical reporting.

Junior Project Management

Itshekeng Educational Tours NPC | Pretoria | January 2025 – December 2025

- Coordinated project activities, tracked timelines and supported delivery from initiation to completion.
- Organised tasks, communicated with stakeholders and monitored progress against scope and deadlines.
- Supported efficient, high-quality project delivery while developing project-management expertise.

SELECTED PROJECTS

AI Call Agent

| |

- Developed an AI voice agent designed to simulate natural conversations and assist businesses with cold and outbound calls.

Property Technology Application — Front-End Lead

| |

- Contributed as front-end lead on a property platform designed as a more capable alternative to traditional property-listing platforms.
- Worked within the development team on the user-facing experience and integration of application functionality.

AI Home Assistant

| |

- Built an AI-powered home assistant as a practical software project, demonstrating initiative in applying AI to a real-world user experience.

InnerCycle

| |

- Developed a women's healthcare application focused on helping users understand their bodies and cycles through educational insights.

EDUCATION & TRAINING

AI Software Engineering — Melsoft Academy | Johannesburg

April 2026 – October 2026
Introduction to Cybersecurity — Cisco Networking Academy | Virtual

January 2026 – February 2026
Full Stack Development — FNB App Academy | Virtual

January 2025 – August 2025
Full Stack Development — SheCodes Foundation | Virtual

January 2023 – August 2023
Grade 12 — New Model Private College | Johannesburg

January 2017 – December 2021
